Some Key Questions

Levels of Assurance; linkages to authentication/authorization

Privacy and Public Record Biography

Business Models and ability to reuse/repurpose databases; what's proprietary?

Interfile/Intersystem synchronization and collective improvement

Standards agendas, shortcomings, gaps

10:40AM – 12:30PM Updates, Clarifications and Discussion

We'll have some *brief* (5-10 minute) presentations; it's assumed participants will have looked at the materials distributed from other participants, but this is a great time to ask specific questions about these projects and how they related to each other. I have a long list of my own questions. A computer and projector will be available if needed.

This will be followed by general discussion, which I will moderate.

ISNI Status (Beat Barblan)

ORCID Status (Chris Shillum)

LC Name Authority File Status (Kevin Ford)

VIAF (Thom Hickey)
