What is Nordunet2?

Nordunet2 is a research programme financed by the Nordic Council of Ministers and by the Nordic Governments. The overriding aim of this programme is to help secure the position of Nordic countries at the forefront of Internet development. Its focus is on network utilisation and network-based applications.

The foundation for the Nordunet2 programme can be found in the proposal from the Nordunet board to the Nordic Council of Ministers, in **RTF** or **PDF.**

The programme will distribute a total of 30 million DKK to Nordic research projects over three years. A **Call for project proposals** for the year 1999 was published in July, 1999, in RTF or PDF.

The scope of Nordunet2

Nordunet2 will focus on four main areas:

- Distance education and lifelong learning
- Tele Medicine
- Digital libraries
- Infraservices

Anders Gillner is the Nordunet2 Project manager. He can be reached at anders.gillner@nordunet2.org

The Nordunet2 secretariat has the following points of contact:
