Building on BIBFRAME's Promise:

Reflecting Rich Assets (Vocabularies)
Providing Translation Keys (Profiles)

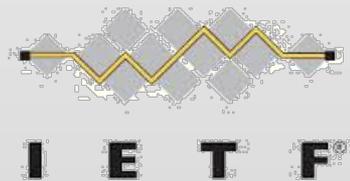

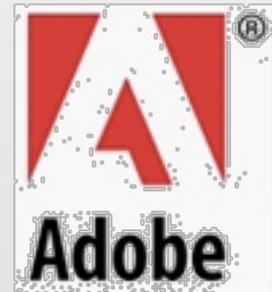

Hi, We are Zepheira

We are a Passionate, Experienced, Strategic, Technical, Entrepreneurial Team.

We love Libraries, Data, The Web, Standards, Open Source, and Learning.

The team's background:

<http://linkedin.com/company/zepheira/>

<http://zepheira.com/>

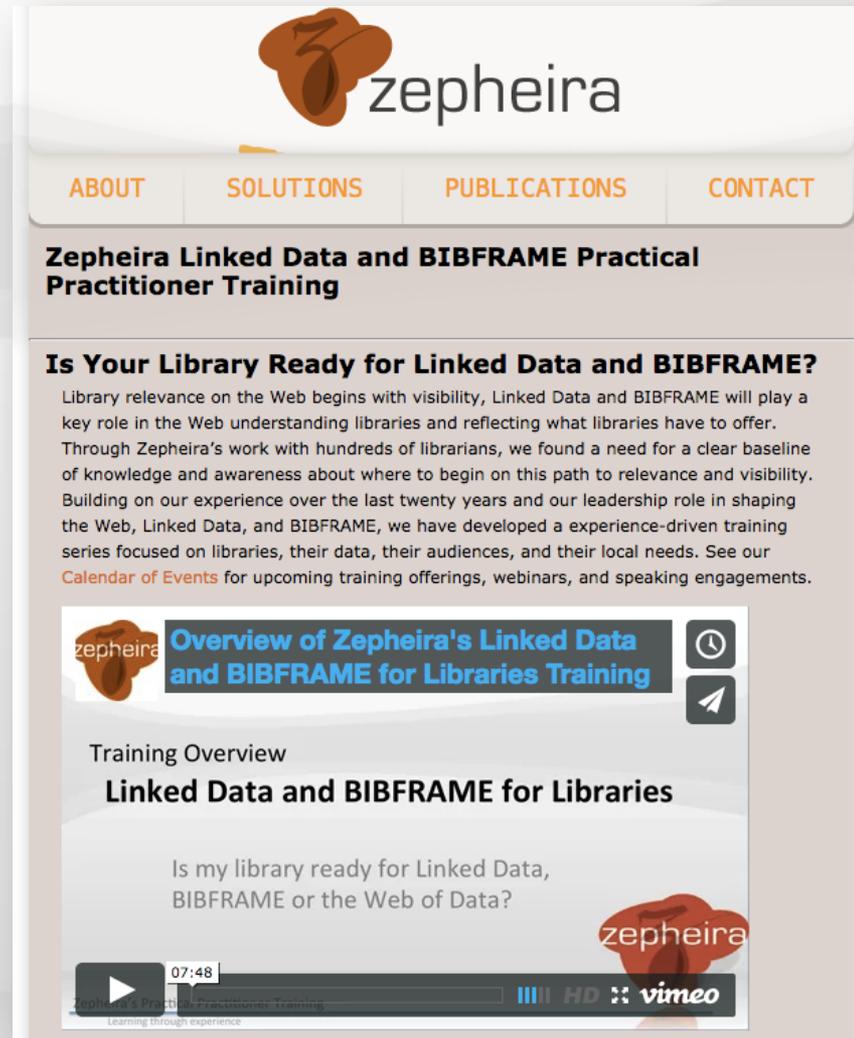

Our experiences in the last 6 months

- 1. Awareness** through Practical Practitioner Training (over 200 participants)
- 2. Assessments** and Transformation (10+ groups)
- 3. Large Scale Activities** (10+ projects)
 - National Library Board of Singapore
 - MESH RDF (beta) @ NLM
 - Denver and Worthington Public Libraries
 - BIBFLOW
 - Converting Workflows to a Linked Open Data Eco System
 - Founding Sponsor of the Libhub Initiative
 - Bringing groups together around library visibility

Practical Practitioner Training

- Online Course
- 4-5 weeks
- Focused on Linked Data, BIBFRAME, & Libraries
- Interactive – Cohort & Z Team
- Your Data, our Tools
- Alumni Community

The screenshot shows the Zepheira website header with the logo and navigation menu (ABOUT, SOLUTIONS, PUBLICATIONS, CONTACT). Below the header is the title "Zepheira Linked Data and BIBFRAME Practical Practitioner Training". The main content area features a video player with the title "Overview of Zepheira's Linked Data and BIBFRAME for Libraries Training". The video player includes a play button, a progress bar showing 07:48, and the Vimeo logo. The text below the video player reads "Training Overview" and "Linked Data and BIBFRAME for Libraries". A question is posed: "Is my library ready for Linked Data, BIBFRAME or the Web of Data?". The Zepheira logo is visible in the bottom right corner of the video player area.

zepheira

ABOUT SOLUTIONS PUBLICATIONS CONTACT

Zepheira Linked Data and BIBFRAME Practical Practitioner Training

Is Your Library Ready for Linked Data and BIBFRAME?

Library relevance on the Web begins with visibility, Linked Data and BIBFRAME will play a key role in the Web understanding libraries and reflecting what libraries have to offer. Through Zepheira's work with hundreds of librarians, we found a need for a clear baseline of knowledge and awareness about where to begin on this path to relevance and visibility. Building on our experience over the last twenty years and our leadership role in shaping the Web, Linked Data, and BIBFRAME, we have developed a experience-driven training series focused on libraries, their data, their audiences, and their local needs. See our [Calendar of Events](#) for upcoming training offerings, webinars, and speaking engagements.

Overview of Zepheira's Linked Data and BIBFRAME for Libraries Training

Foundational, Practical Curriculum

1. History of the Web and Linked Data
2. BIBFRAME Foundations
3. BIBFRAME Data Modeling Essentials
4. Interacting with BIBFRAME & Profiles with Zepheira's Tools
5. Readiness Assessment, Change Management, and Governance

The screenshot displays the Zepheira Foundry interface. The top navigation bar includes 'my page', 'Projects', 'Modules', and a search field. The breadcrumb trail shows 'Training' > 'Early Adopter Training-November 2014-collab' > 'Wiki' > 'Module 1 - History of the Web and Linked Data'. The left sidebar contains a menu with items like 'Overview', 'News', 'Forums', '0-Welcome', 'Module 1 - History of th...', 'Module 2 - BIBFRAME F...', 'Module 3 - BIBFRAME-D...', 'Module 4 - Interacting ...', 'Module 5 - Readiness A...', 'Wiki', 'Office Hours', 'Wiki', 'Documents', and 'Project settings'. The main content area is titled 'Module 1: History of the Web & Linked Data' with instructor 'Uche Ogbuji'. It contains an overview paragraph, a list of five topics, an 'Exercise' section with instructions to introduce oneself in a forum, a 'Handouts' section, and a 'Videos' section featuring a video player for 'History of the Web & Linked Data' (28:20). The URL at the bottom is 'https://foundry.zepheira.com/projects/early-adopter-training-november-2014-collab/wiki/Module_1_-_History_of_the_Web_and_Linked_Data'.

Um für uns zu kommunizieren , müssen wir auf einem gemeinsamen Vokabular zu benutzen zustimmen.

In English, please

“In order for us to communicate we need to agree on a shared vocabulary.”

We need a way to:

1. Translate our concepts (Vocabularies)
2. Represent them meaningfully (Profiles)

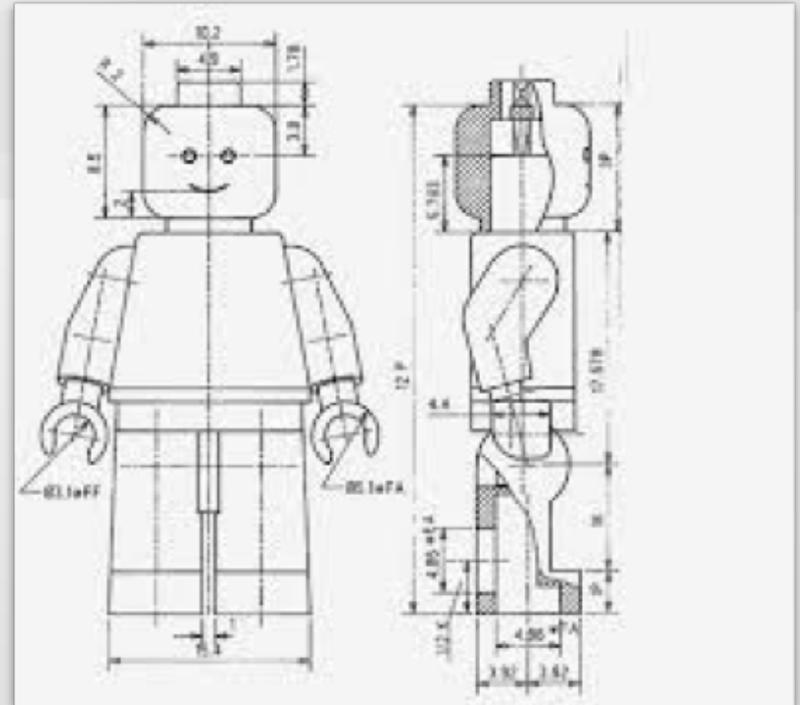

Unifying Vocabularies

- **BIBFRAME** (from the Library perspective)
 - Extensible replacement for MARC
 - “The Initiative aims to re-envision and, in the long run, implement a **new bibliographic environment** for **libraries** that makes “**the network**” central and makes interconnectedness commonplace.”
- **Schema.org** (from the Web perspective)
 - Bib Extend - W3C group – group focused on discussion and preparation of proposals to extend schema.org for improved representation of bibliographic information markup and sharing.

A Descriptive Blueprint

- BIBFRAME common model
 - **flexible, extensible, designed to accommodate** the various needs of our community.
- Recognize creative tension between past and future
- **Vocabularies** capture key elements
- **Profiles** are a blueprint for a specific community or entity description

Vocabularies

- What do you have?
- What are your goals?
- What already exists?
- What makes you unique?
- Test, Review, Iterate, Repeat

Combining Profiles

As a cornerstone of [Zepheira's Practical Practitioner series](#), we believe participants need to get hands on with their own data. To that end, our training includes access to an introductory set of utilities to guide participants through data import, analysis and end user discovery.

The following MARC diagnostics and [BIBFRAME](#) transformation service is provided to participants of this training curriculum. To get started link to, paste in, or upload a MARC XML file (up to 100 records). Feel free to add a 'title' to the data to help describe what you've uploaded.

Load MARC Data from a URL

[Pasted MARC Text](#)

[Upload MARC File](#)

[▶ Advanced Settings \(click to learn more\)](#)

Don't have access to a set of MARC records? Here are some examples others have uploaded. Drag or copy the following links to the URL input form above to transform these records.

 [George Washington sample collection \(small\)](#)

 [Sample Rare Book / Manuscript collection \(small\)](#)

 [National Library of Medicine sample collection \(medium\)](#)

 [Sample Music collection \(small\)](#)

 [George Mason University DVD Backstage sample \(large\)](#)

Excellent! The transformation and diagnostics process was successful. Feel free to bookmark this page to come back to it in the future. Now that you have, you're ready to begin!

- 1** To better understand your uploaded data first look at the  **MARC Field Diagnostics Viewer**
- 2** Now take a look at the  **BIBFRAME Resource Viewer** to help better understand the MARC Records to BIBFRAME Resources transformation process.
- 3** And finally here is a  **BIBFRAME Work-focused Navigator** or a  **BIBFRAME Collection Navigator** to illustrate how your data might look like in a traditional discovery application.
- 4** Don't forget to  **Download your RDF BIBFRAME data**
- 5** And since the future direction of these tools rely on your input  **Help Shape What Comes Next**

Summary

- Processing started on **2014-12-09 at 11:10**
- **11** MARC records analysed in **1.12** seconds
- Input Format:
 - MARC XML
- Output Format(s):
 - Base BIBFRAME RDF (RDF/Turtle)
 - MARC Diagnostics (JSON)
 - Linked Data Discovery (JSON)

Observations (Example)

- **11** MARC records converted to **1214** BIBFRAME Resources
- **230** BIBFRAME Resources folded indicating this data is **moderately connected**
- **4** MARC tags did not match applied transformation rules indicating this data is **moderate candidate** for **custom rule** design
- **15** MARC tags identified as local extensions

13 Works

1. **Zhu fu.**

Creator(s) Lu, Xun, 1881-1936.

2. **The Chinese bubble predictions and perspectives / director & research, Floris-Jan van Luyn.**

Contributor(s) VPRO Backlight (Firm)
 Jianmao, Wang.
 Xie, Andy, 1962-
 Luyn, Floris-Jan van.
 Films Media Group.
 Lun, Feng.

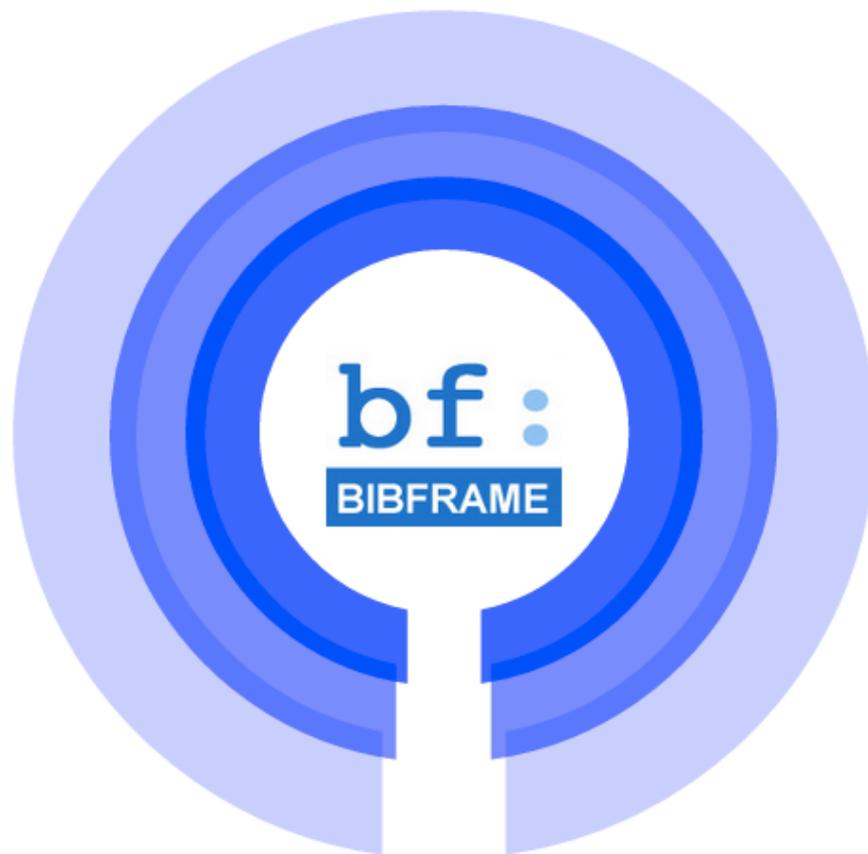

Subject(s) Entrepreneurship > China.
 Documentary films.
 Businesspeople > China.
 Real estate development > China.
 Lun, Feng.

Summary The biggest real estate developer in the world is - unsurprisingly - Chinese. Property tycoon Feng Lun is convinced opportunities are equal for all in China. Other nuanced views come from a taxi driver, a car salesman, and construction worker, as well as from Dr. Wang Jianmao of the China Europe International Business School and

**COMING
SOON**

⚠ The following BIBFRAME Lite and Modular Vocabulary navigator is not complete and for private demonstration purposes only. This work reflects Zepheira's use of modular, layered vocabulary management to support their Linked Data product offerings. These vocabularies are not intended to replace or compete with other Linked Data namespaces. Our hope is by sharing this others may consider similar practices for effective vocabulary management and distributed governance.

Carrier or instantiation associated with a Conceptual Work

Attributes of **instance**

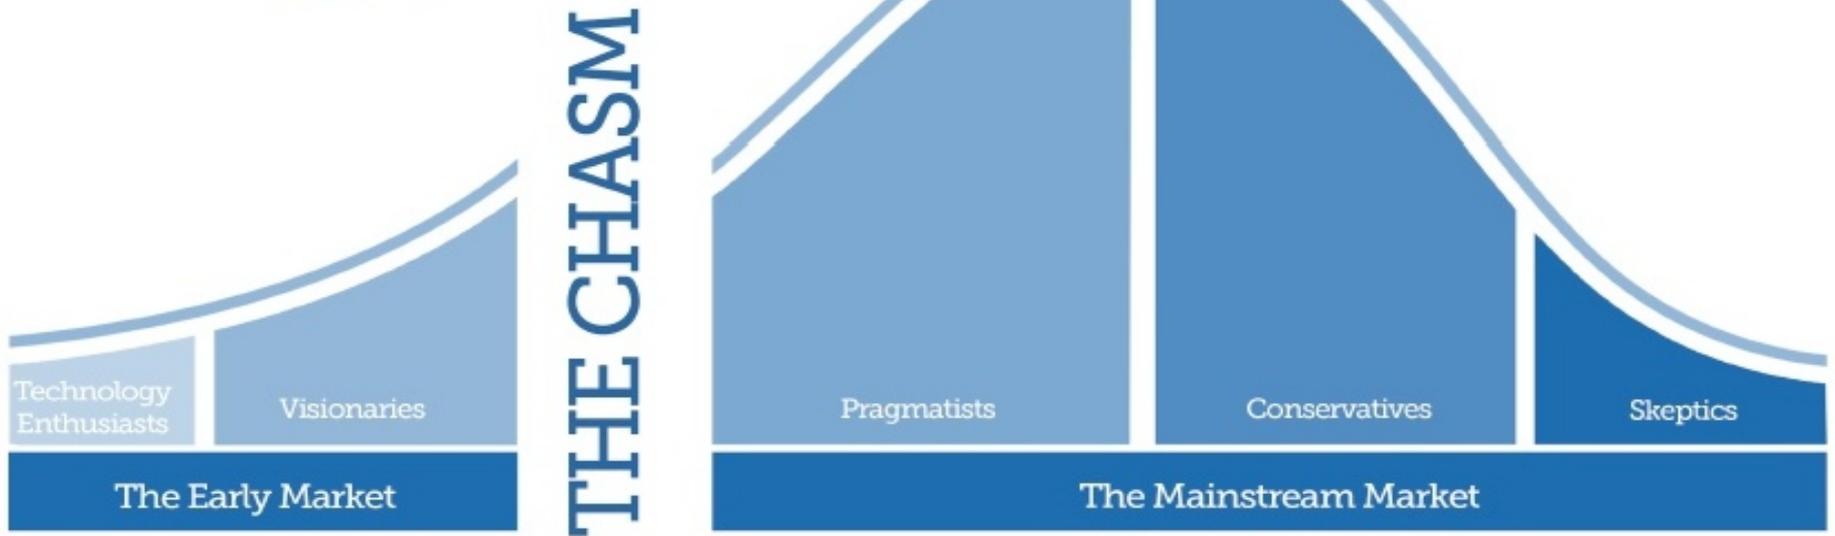

Property	Expected Value(s)	Description	Remark
 instantiates	Work	The Work this resource instantiates or manifests.	For use to connect Instances to Works in the BIBFRAME structure.
 extent	Literal	Number of physical pages, volumes, cassettes, total playing time, etc., of of each type of unit.	
 medium	IRI	The medium of the Instance.	
 dimensions	Literal	A measure of the size of its covering properties.	
 format	IRI	Format of the Instance.	
 title	Literal	Title of the resource.	
 size		The size of the Instance.	

Attributes of **resource**

Property	Expected Value(s)	Description	Remark
 label	literal	The human readable label of the resource	
 description	Literal	Description of the resource.	

Phases of Linked Data / BIBFRAME Adoption

Experimenters

Early Implementers

Data Publishers & Connectors

Mainstream Workflow

Back Office Systems

- Clarify Space
- Determine the Need
- Define a Foundation
- Draft Specifications

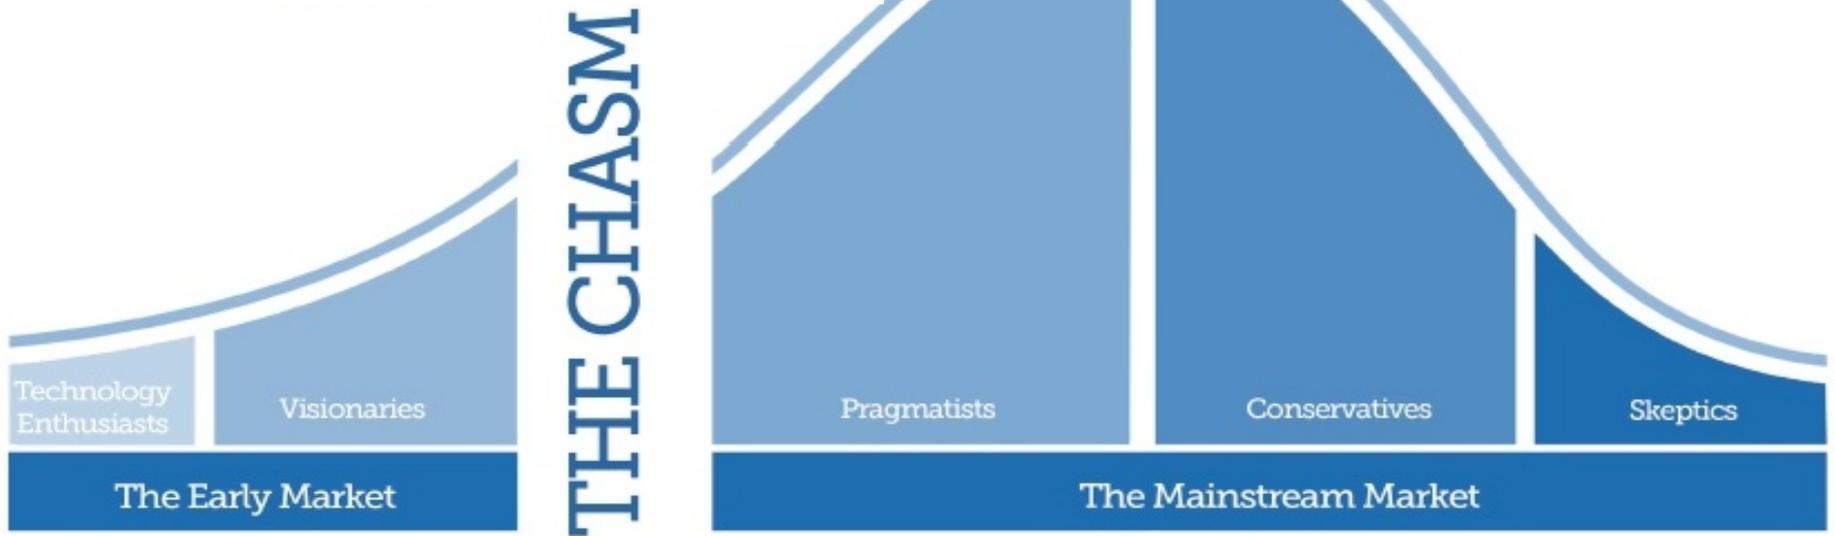

- Test the Assumptions
- Draft Standards
- Evaluate Data, Processes, & Gaps

- Begin to work at scale
- Use other's data
- Participate - Publish, Share, Connect

- "Final" Standards & Best Practices
- New businesses and models

- "There's Linked Data in there!?"

Phases of Linked Data / BIBFRAME Adoption

The Future

- Keep Learning
 - Community Driven Transformations, Evolving Vocabularies
- Continued Collaboration with LC and OCLC
 - BIBFRAME Implementers
 - WorldCat Works, Bibliograph.net
- Engagement with Activities
 - Schema.org, LD4L, BIBFLOW
- Focus on Linking, Connecting, Web Visibility
 - The Libhub Initiative <http://libhub.org>
“Everyone benefits from visibility of libraries and their content on the Web.”
 - Sponsors & Partners – Atlas Systems, MarcEdit, and more to come

Expectations of Library Web Visibility

“When my community searches the Web for something we have, we better show up as an option.”

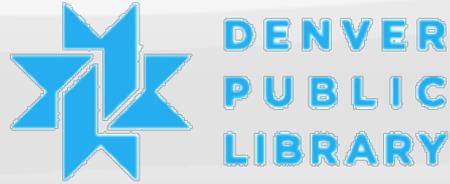

- Chuck Gibson, Director & CEO
Worthington Public Library

Can't ignore the problem...

Learning through action together

WORTHINGTON
LIBRARIES

MULTNOMAH COUNTY
LIBRARY
