Sustaining International Partnerships and Building Open Access Collections

1. UCLA Library:
   Affirming our value(s) during uncertain times

2. Modern Endangered Archives Program:
   Regranting in a Global Pandemic

3. Sinai Manuscript Project:
   Navigating International Restrictions

4. Q and A
ONE

UCLA Library + COVID-19
What this work means to us.

1. **Not neutral.**
   We recognize that digitization work, like archival work, is not neutral and making choices about what gets published online has

2. **Build connections, relationships.**
   We respect the priorities and goals of our community partners and commit to open communication, ongoing flexibility, and a consistent community centered approach.

3. **Respond to global inequity**
   Our programs should support communities without the financial or infrastructural resources to preserve cultural heritage materials. We aim to make accessible voices that have been overlooked or undervalued in dominant historical and political narratives.
UCLA Library Priorities

Use our expertise, resources to support and expand capacity for cultural heritage preservation from all parts of the world.

- Preserve and share knowledge from around the world
- Commitment to Global Value of knowledge preservation and collections stewardship
- Share resources across the globe in acknowledgment of areas in the world that do not have the infrastructure or institutional support to do this work.

We look for **collections** that:

- Expand our understanding of the world and human experience
- Support research and teaching mission at UCLA
- Rare, endangered, under political threat
Modern Ethical Collecting means building Decentralized *Networked* Collections that are Community Centered

**Postcustodial & Postcolonial Collecting**

- *Building Relationships*
- Authenticity
- Collaboration
- Preservation
- Joint publication sans acquisition

> Respect for local context
> Dedication to the material
> Developing partner programs is cornerstone
The International Digital Ephemera Project is an initiative to digitize, preserve and provide broad public access to print, images, multimedia, and social networking resources produced worldwide. Learn More>

Postcustodial Digitization

Share Expertise and Build Knowledge Networks

- Build equitable partnerships between institutions
- Conserve and preserve endangered materials
- Encourage local and transnational knowledge networks
- Provide broad public access to research and cultural heritage materials
Scholarship in the Covid Landscape

Recognizing shifts in Higher Education and the role of Academic Libraries in this space.

- How will COVID change academics and how will that impact library work?
- How can we train researchers to ask different questions?
- At-risk scholars, highest pressure
- What will long-term budget impact look like?
Scholarship in the Covid Landscape

Time to work:

SET GOALS THAT MATCH YOUR RESEARCH QUESTIONS
- See events in progression?
- See events as overlapping, interconnected
- See events at scale: intimate, global
- Work with large sets of texts, maps, images

Adaptation

- New technologies
- New formats
- Truncated time period
- Limited to sources online
- Focus on theory, secondary literature

Can you respond to the moment?
What kinds of questions might we ask?
Can we interrogate methodology?
Dig into lit review?
Identify what’s missing, what’s necessary?
TWO

Modern Endangered Archives Program (MEAP)
The Modern Endangered Archives Program (MEAP) is a new UCLA Library granting program.

We fund projects to digitize and make accessible endangered archival materials from the 20th and 21st Centuries, including print, photographic, film, audio, ephemeral, and born digital objects.

All MEAP content must be shared openly online: Survey, Inventory, Digital Images, Audio files, Video. Raises challenges around copyright, privacy & ethics.

Learn more at meap.library.ucla.edu
MEAP: Overview - Cohort 1 + 2
We Preserve Cultural Heritage
Our grants enable digitization and access to at-risk cultural heritage collections from around the world. Learn more ›
IDEP Partner Toolkit

The International Digital Ephemera Project (IDEP) is an initiative of the UCLA Library to capture ephemeral content with global partners. Through this project, the library endeavors to build international and global collections of knowledge, and to preserve the historical and cultural record. The ultimate goal is for present and future generations to access and use ephemera documenting the larger arena of discourse that takes place alongside mainstream media and scholarly publications.

For more information on IDEP, visit the project site: http://idep.library.ucla.edu

The UCLA Library works closely with project partners to capture, preserve, and describe new forms of knowledge, records, and content. This toolkit outlines standards, workflows, and best practices for contributing to IDEP.

Lens Settings

- The aperture on the lens should be set to the smallest setting (E8) on the diaphragm.

- autofocus: Rotate the A/M mode ring on the lens while pressing the A/M mode ring release button, selecting A for autofocus.

Camera Settings: Nikon: Review the camera manual, and especially pages 1-5 for help with adjusting and finding settings as well as getting to know the camera.

- ISO - set to 100

- Mode - set to M

- Aperture - set between F11 and F16, starting with F8. Stopping down, also decreasing the size of the aperture, increases the depth of field. If too much of the object is depths, or distance from the camera, remains in focus. A narrower aperture can improve overall sharpness.

Setup Lightroom or desktable

Start up and log in to laptop and connect camera to laptop via USB3 tether cable

If using Lightroom

- Open Lightroom

- Create new catalog, name appropriately. Remember, this is a catalog in Lightroom, and it can contain multiple sessions.

- Click File > Tethered Capture > Start Tethered Capture

- In the library, photos and videos captured from another catalog will appear as a new collection.

- In the photo and video editor, select Lightroom Elements to export the selected photos.

- Click Auto Import

- Choose your export type:
  - Select Export as PDF
  - Select Export as JPEG

- Exporting files to TIFF format

- Choose your export type:
  - Select Export as JPEG
  - Select Export as GIF

- Click Export

- Lightroom will automatically find the camera in use. A box should pop up that says Nikon D850 is in use.

- Name the session you are in with a date (recommended), or collection name and session number

MEAP During Covid

Program **built to address risk.**

- Built to address, anticipate and mitigate risk
- Also built to intervene in risky situations

Changing and increasing needs.

- Delays + timeline extensions
- Travel restrictions: Gaps in training; project teams disbursed
- Procurement: teams struggled to get scanners, cameras, acid free folders; Cannot bring equipment from US or send back hard drives
MEAP During Covid

Flexibility for projects at all stages

- Delay for ongoing projects - up to a year if necessary
  - Some top up money if needed

- Continued evaluation for open round of applications
  - Virtual panel review
  - Feasibility Reports to address necessary edits

- Open new call for applications (Closed Nov 9)
  - 93 applications with archival materials from 54 countries
Global Digitization

Local + hyper local. **There's no one answer for each project team.**

- Some neighborhoods are open
- Some whole countries are open
- Some areas are closed down indefinitely
- Different public health directives

Requires **flexibility**. Inviting reflection + revision from all project teams.

- Delays
- New organizations
- New project teams

THREE

Sinai Manuscript Project
Sinai Project

St. Catherine’s Monastery of the Sinai (Egypt)

Digitizing the Monastery’s collection of Arabic and Syriac manuscripts

Monastic Life

- Not nearly as exciting as it sounds
- Aging and isolated
- His Eminence the Archbishop, Egypt’s Minister of Antiquities and international diplomacy
Sinai Project

Digitization Team:

- Four person team from Athens
- Month long on-site digitization sessions
- Quarantines and testing
- International travel restrictions
Impact on the project

- Gap funding from Arcadia
- Digitization team left the most difficult to handle for the end of the project
- Digitization team switched to data curation
- Project timeline extended 2 x
- Recognizing similarities, overlaps
“We believe that the work of post-custodialism, much like social justice, is less a static set of methodologies than an ongoing process of learning, unlearning, and restructuring.”

Why is this work essential?

We are all losing so much during the pandemic, including financial support for cultural heritage work. The value of preserving voices around the world should inform our work, our investments, our digital capacities.

The Right to be Forgotten

“If an individual no longer wants his personal data to be processed or stored by a data controller, and if there is no legitimate reason for keeping it, the data should be removed from their system.”

Viviane Reding, Vice President, Eur. Commission.
January 22, 2012.
“The struggle against power is the struggle of memory against forgetting”

Milan Kundera, The Book of Laughter and Forgetting, 1980
