Digital Scholarship Services (DSS) provides a wide range of services and tools to facilitate the growth of digital collections and projects. We partner with faculty to develop digital research projects that allow for new analytical approaches and access points. These projects also create unique pedagogical opportunities for faculty and students to work together. This website is a launching point into our rich collections and burgeoning new projects.

Digital collections have grown dramatically at Lafayette College over the past few years. Our collections have become essential resources for not only the Lafayette College community, but also the general public.

No matter how big or small the project, DSS is happy to consult with you and discuss what digital tools and solutions we can offer to meet your needs. Please visit [Services](#) to learn more about what we can do for you. We welcome new projects so please contact Digital Scholarship Services using the Contact Us link above or the information below if you have an idea you would like to discuss.
