Libraries throughout Chicago ask:

How do we open up our archives and digital collections to Chicago researchers?

We did all this work to write finding aids, create collection records and digitize but nobody knows what’s in our archives.
Chicago Portal: The Vision

• **Depth** of access

• Chicago focus

• Accessible to the novice but supports the seasoned researcher

*Scheduled for August 2015 release*

*Thanks to Andrew W. Mellon Foundation*
Chicago Portal: Scope

- ~1,500 EAD finding aids
- Hundreds of PDF finding aids with associated MARC
- ~2,000 collection level MARC records
- ~150,000 digital images
  - Custom CONTENTdm
  - MARC
Our Challenges

Assume

• No one is going to adjust their local standards or practices

• No one is going to maintain a second version of metadata for the CCC
Don’t Assume

• That we can just point to CCC members’ image records – some have digital images with no discovery platform
CCC Portal Technology Choice

XTF (eXtensible Text Framework)
Reason 1

Flexible metadata processing
Reason 2

XTF allows variation
Reason 3

XTF allows full-text searching across all documents
Reason 4

A dc.xml “side-car” file accompanies each document
Reason 5

XTF works out of the box to index, search and display. Yet ...
Reason 6

XTF can easily be turned into a client/server solution
Reason 7

Support

(http://xtf.cdlib.org)
Test Data Set: Minimal Processing

XTF has been optimized to recognize metadata element mapping, but none of Hopper's dc:xml files are included.

Subject

- 14th Street Yard (Chicago, Ill.)
- Adler and Sullivan.
- Adler, Dankmar, 1844-1900.

```
Deposit & Replace

Create new deposit rules for:
- Digital Images: separate XML files
- Digital Images: using a single XML file

Tips
If you want to create a rule set for a metadata format that does not appear here, please contact the portal manager.
Create Import Mapping Rules: Digital Images

Step 1 of 5: Prepare

You will be asked to identify which fields contain each record's title and other elements. You can also use one of the import mapping rules worksheets to help you build your import rules or have a record open for review. You will also need one sample file that contains all the element paths or fields you've identified. This file will be used as a test to make sure what you've specified is correct and will be discarded after tested.

Click next to start building your import rules.

[Cancel] [Next]
Create Import Mapping Rules: Digital Images

Step 2 of 5: Name & Describe

Name:
AIC Images

Displays to the user to help select the correct rules for deposit

Description:
Images from AIC CONTENTdm
Create Import Mapping Rules: Digital Images

Step 3 of 5: Submit a sample file

Please submit a sample metadata file. When you specify your fields in the next screen, you will have a chance to test each path against what is in the sample file you submitted.

This sample file should have values for all element paths you will specify in your rules. If you don't have a file that has values for all element paths, feel free to create a file that has values for all element paths.

The sample file you use will not be added to your portal content, and can contain dummy data.

Sample file:

Browse... U525784.xml
The metadata file for each image must contain the file name of the corresponding image.

**Suffix:**

**Image submission**

Will you be submitting image files?

Yes
Create Import Mapping Rules: Digital Images

Step 5 of 5: Define Import Fields

* Title

The element that is the source for each object's title.

Source element:

Test:

Title (subtitle)

This will be appended to the end of the title. Example - Title: Subtitle

Source element:

Instance:
This XML file does not appear to have any style information associated with it. The document tree is shown below.

```xml
<record>
  <TitleProjectName>
    Century of Progress International Exposition, General Motors Building
  </TitleProjectName>
  <AlternateTitleProjectName/>
  <StreetAddressNeighborhood/>
  <City>Chicago</City>
  <StateProvince>Illinois</StateProvince>
  <Country>United States</Country>
  <DateDesignedOrBuilt>1932-1933</DateDesignedOrBuilt>
  <ExhibitionDate/>
  <MembershipDates/>
  <IllustrationDates/>
  <ArchitectDesignerCreator>Kahn, Albert</ArchitectDesignerCreator>
  <AdditionalArchitectOrDesigner/>
  <ArchitectOrDesignerNotes/>
  <ProjectPersonnel>Milles, Carl [sculptor]</ProjectPersonnel>
  <ProjectPersonnelNotes/>
  <BuildingStyle/>
  <BuildingType/>
  <DateOfView/>
  <DateOfObject/>
  <ViewOrDetailType>Exterior</ViewOrDetailType>
  <ImageNotes/>
  <DuplicateStaffNote/>
  <CaptionInscriptionText/>
  <PrintCaptions/>
  <InscriptionLocation/>
  <Photographers/>
  <DigitalCollectionName>Archival Image Collection</DigitalCollectionName>
  <ArchivalCollectionName>Historic Architecture and Landscape Image Collection</ArchivalCollectionName>
</record>
```
Create Import Mapping Rules: Digital Images

Step 5 of 5: Define Import Fields

* Title

The element that is the source for each object's title.

Source element:

```
record/TitleProjectName
```

- Century of Progress International Exposition, General Motors Building

Test

Title (subtitle)

This will be appended to the end of the title. Example - Title: Subtitle

Source element:
Subject

The source for subject terms. These will be searchable and may be used to automatically apply tags in the public portal.

Source element:
record/SubjectTerms

Instance:
All

Has delimiter:
Yes

Delimiter:
;

We’re mapping:

- Title (*required*)
- Subtitle
- Title (date – for EAD)
- Dates
- Local Identifier
- Description
- Names
- Subject
- Geographic Coverage
- Source Archival Collection (for images)
- Digital Collection Name (for images)
- Digital Collection URL (for images)
- Rights
Create Import Mapping Rules: Digital Images

Confirmation - Rules Created

Use AIC Images to add a new batch of records.

Rule set saved:
